

IN YOUR 70s, the skin may feel dry due to the loss of natural oils our skin produces. Having the proper cleanser and multi-action moisturizer prevents the skin from being over stripped of its moisture, while maintaining the same humectants and lipids our skin needs to stay balanced.

DR. MAFFI RECOMMENDS:

STEP **1** MORNING + EVENING
CLEANSE with a replenishing cleanser

GENTLE CLEANSER

STEP **2** MORNING
PREVENT with an antioxidant

C E FERULIC®

STEP **3** MORNING
CORRECT with a multi-action moisturizer

TRIPLE LIPID RESTORE 2:4:2

STEP **4** MORNING
PROTECT with a broad spectrum sunscreen

PHYSICAL UV DEFENSE SPF 50

EVENING
CORRECT for cellular turnover

GLYCOLIC 10 RENEW OVERNIGHT

THERE IS BEAUTY AT EVERY AGE.

70s **RECOMMENDED TREATMENTS**

DERMAPLANING

Dermaplaning is an exfoliation treatment that removes the outermost layer of skin and fine hair (peach fuzz). It allows for better penetration of skin care products. The treatment can be done alone or with other treatments such as HydraFacial, Hydradermabrasion or certain Chemical Peels.

HYDRAFACIAL™ + PERKS

HydraFacial is a gentle treatment that starts with Dermaplaning. This is followed by a multistep process which cleanses, exfoliates and extracts the skin of impurities and dead skin cells while quenching the skin with antioxidants, peptides and hyaluronic acid. The treatment leaves your skin with a healthy, refreshed glow. Customize your HydraFacial with an added Perk of a specialized eye or lip treatment.

MICRONEEDLING

Microneedling is a minimally invasive skin rejuvenation treatment using a dermal device with tiny microneedles that puncture the top layer of skin, stimulating the production of collagen. The procedure targets fine lines and wrinkles, acne scarring and melasma. There is minimal to moderate downtime.

INJECTABLE: BOTOX® / DYSPORT®

Botox / Dysport temporarily relaxes muscles, such as those in the face, maintaining your natural youthfulness by smoothing lines and wrinkles. It's a subtle procedure, quick and effective in having you look your best.

INJECTABLE: FILLERS

Dermal fillers are non-surgical treatments where material is injected into the skin to fill and smooth facial wrinkles and folds. They can also be used for volume replacement, bringing back a more youthful appearance.

BBL PHOTOFACIAL

BBL (Broadband Light) Photofacial is the 'next generation of IPL', bringing an innovative approach to phototherapy with little to no downtime. This corrective treatment targets redness, sun spots and hyperpigmentation. By infusing light energy into the skin, the skin cells regenerate new collagen, resulting in smoother, vibrant, younger looking skin.
